### Software & ML Engineer

- 📅 September 2019 - September 2021  
📍 NCSR Demokritos (SKEL, IIT), Athens
- E-science platform providing workflows-as-a-service using Django and Flask frameworks, enabling domain developers (seismologists, physicists etc) to execute their experiments by hiding infrastructure complexities.
  - Implementation of an Argument Mining system using BERT-based models.
  - Technologies used:* Huggingface transformers, PyTorch, flairNLP, Django, Flask, FastAPI, Kubernetes, Docker, Elasticsearch, etc.

### Software Engineer

- 📅 August 2018 - August 2019  
📍 VoiceWeb S.A., Athens
- Redesign and implementation of the company products to follow the microservices architecture paradigm using Spring Boot
  - Product's data layer improvements, creation of a Rule Engine (MongoDB) in the backend instead of reading the rules from XML files
  - Implementation of a novel RESTful API for the Dialog Manager
  - Redesign and implementation of a new UI for the NLI (Analytics) platform

### Software Engineer

- 📅 May 2016 - July 2018  
📍 G.N.T. Information Systems S.A., Athens
